Budget Type	Description
Appropriation Budget	<ul style="list-style-type: none"> • The Appropriation Budget is the spending authority granted by the legislature at the Agency, Fund, and Budget Unit level. The Appropriation Budget is centrally maintained. • Transactions that exceed spending authority will fail when budget checked against the Appropriation Budget. Transactions cannot be processed and recorded until they pass budget check.
Cash Control Budget	<ul style="list-style-type: none"> • The Cash Control Budget stores information about the agency's actual cash balance. Cash Control Budget is a separate ledger from actual expenses, revenue, and appropriation budget. • The Cash Control Budget maintains detail on cash balances in order to facilitate budget checking against the cash balance • The information in the Cash Control Budget is not truly a budget –it is a reflection of cash balances. However, it is structured like a budget in SMART so that financial transactions can be “budget-checked” against cash balances. • Cash Control Budgets are managed at the Fund ChartField for type 1 funds and at the Fund/Budget Unit ChartField for type 2 funds. Transactions are budget checked against the Cash Control Budget.
